TO WHOM IT MAY CONCERN

AB Biotek has Food Safety and Quality as our highest priorities.

We aim to provide products which meet expected food safety standards and ensure this through good manufacturing practice, plant environmental micro-monitoring protocols and a comprehensive food safety and quality assurance programme that only sources ingredients from approved suppliers against agreed specifications, confirming that suppliers take appropriate steps to minimise the potential for food contaminants.

We hereby confirm that all AB Biotek brewing yeast and brewing yeast products manufactured for AB Biotek are produced and packed under strict supervision and sanitary manufacturing conditions by qualified personnel in food manufacturing facilities that meet the requirements for manufacturing of such products.

The Primary packaging materials used in the manufacture of these products are suitable for Food contact. This is validated by:

- Written warranty from suppliers
- Approval of suppliers/ materials through our Vendor Assurance Programme
- Supplier audit where appropriate
- Due diligence testing where appropriate.

The above products are designed to be used for the making of beer and they are not “ready to eat” products. Although these products are intended for the production of beer, they are fit for purpose and suitable for food and beverages manufacturing.

Customers using such products should carry out their own risk assessment to ensure that their processes are adequate to guarantee that their own finished products are food safe.

If further information is required, please do not hesitate to contact the undersigned.

Yours Sincerely,

Kobus van der Westhuizen
QESH Manager
